## Front-End Developer

📍 Dakahli , Egypt 📞 +201032562631 ✉ [mohamedmahomed403@gmail.com](mailto:mohamedmahomed403@gmail.com) 🌐 mohamed8eo

## Technical Skills:

---

- Programming:                    Html, Css, JavaScript
- Frameworks:                    React , Tailwind
- Operating System:            windows and Linux
- Tools:                             Git, Github, Vite , npm

## Projects:

---

### Age Calculator:

<https://github.com/mohamed8eo/age-calculator-app-main.git>

This intuitive age duration calculator allows users to quickly and accurately calculate the time difference between a selected date and the current date. Users simply input a **day (DD)**, **month (MM)**, and **year (YYYY)**, then press the calculate button to receive a breakdown of the elapsed time in **years**, **months**, and **days**. Designed with a minimalist and user-friendly interface, this app is ideal for tracking birthdays, anniversaries, or any significant past dates. The clear and bold display makes it easy to interpret results at a glance. **(React + Tailwind + Vite )**

### Space tourism website:

<https://github.com/mohamed8eo/space-tourism-website.git>

This immersive, multi-page website invites users into the thrilling world of space tourism. Developed using **React** for dynamic component management, **Tailwind CSS** for responsive and elegant styling, and **React Router** for seamless navigation, the site delivers a sleek and interactive user experience. **(React + Tailwind + Vite + API + React Router )**

Users can explore various sections including:

- **Home** – A visually striking introduction to space travel with a call to action that engages users immediately.
- **Destination** – Learn about potential space destinations and what makes each one unique.
- **Crew** – Meet the astronauts and professionals who make space travel possible.
- **Technology** – Discover the spacecraft, especially the **Space Capsule**, with descriptions and 3D visuals that explain its functions and onboard facilities.
